

Design code: The design code is a 4-digit one, and varies with the finish, etc.

Finish code: The finish code and the corresponding color tone are given in the CASING PARTS CATALOGUE. The second digit of the finish code denotes the color tone. Refer to the table below.

The second digit of the finish code	* Color tone
1, S, H, A, C	Silver
2, G, F, J	Gold
3, B	Black
4, N	Grey
5, L, X, U	Blue
6, E	Green
7, R	Red
8, Y	Yellow
9, P	Combination
0, Z	Combination

Glass

The structure of the parts number for the glass is classified into two groups according to the shape of glass, that is, whether the glass shape is round or not.

(a) Round shaped glass (10 digits)

* Note: In the coding system for glass, type code and finish code have been revised from 1990 new models.

Ex. **2 0 0 W 4 7 L N 0 0**
 Diameter 20 mm Water resistant No. 47 Hardlex Ordinary finish Transparent

<Revised>

Ex. **2 0 0 P 0 2 L N 0 3**
 Diameter 20 mm Pressed in using plastic gasket No. 2 Hardlex Ordinary finish Transparent

Size code: The size code shows the glass diameter in three numerical digits.

Ex. 200 20 mm
 230 23 mm

* Type code: Expressed in one letter.

<Old>

	No accessory	With tension ring	With ring or bezel	With other accessory
Water resistant	W	T	V, G	X
Non-water resistant	N	D	R	Y

<Revised>

The following two letters are newly used to identify the mounting structure of the glass. "N" and "W", which were used so far to denote the water resistant quality, have been replaced by the new classification.

- A : Bonded
P : Pressed in using plastic gasket

Ex.)

Old					New														
2	0	0	<u>N</u>	2	1	S	N	0	1	2	0	0	<u>A</u>	0	1	S	N	0	1
R	E	0	<u>W</u>	1	5	J	N	0	2	R	E	0	<u>P</u>	0	1	J	N	0	2

Note: "N" and "W" will still be used for glasses having other types of mounting structure such as welded glass.

Serial No. code: A number from 01 to 99 is assigned for the purpose of production-related classification.

Material code: Expressed in one letter.

- Ex. A : Acrylic glass
E : Acrylic glass/others
G : }
H : }
J : } Hardlex glass (Inorganic tempered glass)
K : }
L : }
S : Sapphire glass
Z : Others

* Finish code: Expressed in one letter.

Finish Code

Classifications	No-treatment		Treated			
	Old	Revised	Printed		Evaporated	
			Old	Revised	Old	Revised
Ordinary finish	N	←	M	*	V	*
Cut	C	N	H	*	J	*
Curved	K	N	U	*	R	*
No-reflection coating	B	*	G	*	W	*
Antistatic coating	D	*	P	*	T	*
Ion plating treatment, etc.	E	*	Z	*	L	*
Anti-fogging coating	A	←	F	←	Y	←

Note:

- * A numeral (from 1 to 9) or a letter of the alphabet (M, V, H, J, R and S) is assigned in the order in which the code is established.
- Curved glass (K) and cut glass (C) are newly classified as ordinary glass (N).

Transparent

Shape code: Expressed in two letters to show the plane view of glass.
The following gives typical shapes.

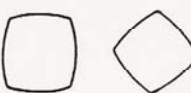

AL (Almond) 

BA (Barrel) 

TD (Teardrop) 

KO (Oval) 

SQ (square) 

SA 

RE (Rectangle) 

WA (Lozenge) 

ES Others

Serial No. code: A number from 0 to 9 is assigned for the purpose of production-related classification.

Crown There are old (8 digits) and new (10 digits) coding systems.

<OLD> (8 digits)

Ex.

3 5 R 0 1 N A 1

Size code: Two numerical digits to show the outside diameter of the crown.

Ex.

3 5 → 3.5 mm
